GitHub: github.com/praveenjaisingh | Portfolio: portfolio-seven-blond-mvipujv79o.vercel.app

PROFILE

Backend Developer with 1 year of hands-on experience building and maintaining web applications using PHP (Laravel). Skilled in developing RESTful APIs, working with relational databases, and collaborating in agile teams. Strong foundation in full-stack development (HTML, CSS, JavaScript, Node.js, React) with a Computer Science Engineering background. Passionate about writing clean, efficient code and delivering reliable IT solutions.

TECHNICAL SKILLS

Languages: PHP, Java, JavaScript, HTML, CSS

Frameworks: Laravel, Node.js, React.js (Basic)

Databases: MySQL, PostgreSQL

Tools: Git/GitHub, VS Code, Postman, Eclipse

WORK EXPERIENCE

Backend Developer — Cloud Revel Innovations Aug 2025 – Present

- Develop and maintain backend features and RESTful APIs for web applications using PHP (Laravel).
- Design and manage database schemas, queries, and migrations in MySQL/PostgreSQL to support application features.
- Implement authentication, authorization, and CRUD modules using Laravel's MVC architecture.
- Collaborate with frontend developers to integrate APIs and ensure smooth end-to-end functionality.
- Debug, test, and optimize existing code to improve performance and reliability.
- Participate in code reviews, version control (Git), and agile team workflows.

Python Trainee — Phoenix Softech Jul 2023 (Short-term Training)

- Completed a hands-on Python training program covering core programming and problem-solving concepts.
- Collaborated with peers and received mentorship from experienced instructors to strengthen coding fundamentals.

PROJECTS

Explore City — explore-city-phi.vercel.app

- Built a city exploration web app using Node.js with user registration and login functionality.
- Designed backend routes and session handling to manage user accounts securely.

SelfAI — self-ai-seven.vercel.app

- Developed an AI-assisted self-help application using Node.js with user authentication.
- Implemented backend logic to handle user sessions and app data flow.

SmartAgri-Connect — smart-agri-connect-gamma.vercel.app

- Built a full-stack e-commerce platform for agricultural product sales using HTML, CSS, JavaScript, Node.js, and PostgreSQL.
- Implemented user authentication, product listings, cart, and order management features.
- Designed a responsive UI and managed backend data for users, products, and transactions.

IP + GPS Location Finder — ip-bice-rho.vercel.app

- Built a location intelligence tool using Node.js that resolves IP and GPS coordinates to address details.
- Integrated third-party geolocation APIs to fetch country, region, city, ZIP, ISP, and timezone data.

AI Resume Analyzer — ai-resume-analyzer-nine-weld.vercel.app

- Developed a Node.js application that lets users upload a resume PDF and receive AI-generated improvement suggestions.
- Implemented file upload handling and PDF generation for the updated resume output.

Real-Time Interview Platform — real-time-interview-platform-zeta.vercel.app

- Built a real-time interview platform backend using Node.js with user authentication.
- Designed the system to support live interview sessions between users.

Repo/Graph – GitHub Repository Analytics — git-hub-repository-analytics-backen.vercel.app

- Built a backend analytics tool that fetches GitHub repository data via the GitHub API to surface insights such as commit activity, contributors, and repository statistics.
- Designed API integration and data-processing logic to transform raw GitHub data into readable analytics for users.
