

PRAVEEN J

SOFTWARE ENGINEER | BACKEND DEVELOPER

PHP | Laravel | REST APIs | MySQL | PostgreSQL | Node.js

+91 88703 46885 | praveendp146@gmail.com | Madurai, Tamil Nadu | GitHub | Portfolio

PROFILE

Software Engineer with 1 year of professional experience developing and maintaining backend applications using PHP, Laravel, Node.js, MySQL, and PostgreSQL. Experienced in building RESTful APIs, authentication and role-based authorization, CRUD operations, database design, API integration, and debugging production issues. Strong understanding of MVC architecture, Git, Agile development, and writing maintainable backend code.

TECHNICAL SKILLS

Backend:	PHP, Laravel, Node.js, Express.js, RESTful APIs, MVC
Databases:	MySQL, PostgreSQL
Programming:	PHP, JavaScript, Java
Authentication:	Role-Based Access Control, Authentication, Authorization
Tools:	Git, GitHub, Postman, VS Code, Eclipse
Practices:	Agile/Scrum, Unit Testing, API Integration, CRUD

WORK EXPERIENCE

Junior Software Engineer — Cloud Revel Innovations

Aug 2025 – Present

- Developed and maintained RESTful APIs using PHP/Laravel for production applications.
- Implemented authentication, role-based authorization, and CRUD functionality using Laravel MVC architecture, improving backend feature development and maintainability.
- Designed database schemas, migrations, and SQL queries using MySQL/PostgreSQL for backend features and API-driven applications.
- Integrated backend APIs with frontend applications and resolved API integration issues to ensure smooth, reliable functionality.
- Debugged and optimized existing API endpoints to improve application performance and reliability.
- Collaborated with developers in Agile sprints (standups, sprint planning) using Git/GitHub for version control.
- Contributed backend features across three company projects: Finzor CBS, Domsync, and Timescale.

PROJECTS

SmartAgri-Connect — smart-agri-connect-gamma.vercel.app

- Developed a full-stack e-commerce platform for agricultural products using Node.js, Express.js, PostgreSQL, HTML, CSS, and JavaScript.
- Implemented authentication, product listings, cart, and order management.
- Built REST APIs and integrated frontend and backend components for end-to-end application functionality.

RepoGraph — GitHub Repository Analytics — git-hub-repository-analytics-backen.vercel.app

- Built a backend analytics tool that pulls repository data via the GitHub API to surface commit activity, contributors, and repo statistics.
- Designed the API integration and data-processing pipeline that transforms raw GitHub API responses into readable analytics output.

Other projects: AI Resume Analyzer, Explore City, SelfAI, IP + GPS Location Finder, Real-Time Interview Platform — Node.js apps covering file handling, geolocation APIs, and authentication/session management. Links on GitHub and portfolio above.

EDUCATION

B.E. Computer Science — Pandian Saraswathi Yadav Engineering College

2021 – 2025

CGPA: 8.1

CERTIFICATIONS / TRAINING

- Java Full Stack Development — JSpiders (Java Training and Development Center), Chennai — Granted 27-09-2025. Covered Core Java, J2EE, SQL, Web Technology, and Frameworks. Certificate No: JSP-25-4203.
- Python Trainee, Phoenix Softech (Jul 2023) — short-term hands-on training in core Python programming and problem-solving.
